Fottler, Fiske, Rawson Co.'s Highest Grade Vegetable Seeds for the MARKET GARDENER

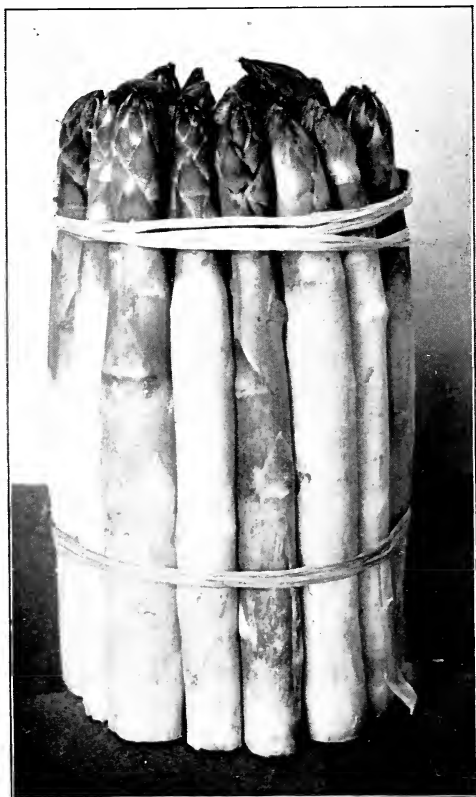

To produce the quality of seeds satisfactory for Market Gardeners' use is not an easy task, and every effort is unsparingly used to have the seeds which we offer of the Highest Grade; that they may produce for the grower the most satisfactory results and the largest amount of returns.

Market Gardeners' orders should be placed as early as possible, to insure our best attention and also to have the orders filled before stocks are exhausted. Shortages usually occur in Marketable Varieties and Special Strains.

Prices subject to change without notice.

CONDITIONS OF SALE. We give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, plants or bulbs we sell; and we will not be in any way responsible for the crop. All orders taken by our agents or salesmen, including any special terms or conditions pertaining to same, are subject to the approval of our home office. If the purchaser does not accept the goods on these terms, they are to be returned at once.

CLOVER

(Prices on clover variable during the season.)

ALFALFA (*Medicago sativa*). Alfalfa is the mainstay of the cattle farmer, particularly the dairyman. It is grown successfully in almost every section of the United States and Canada. Alfalfa requires a deep, fertile, well-drained soil, rich in lime and free from weeds. The lack of any one of these may be the cause of failure especially in the Southern or Eastern States. Well-rotted barnyard manure is a suitable fertilizer. Do not use fresh manure as it produces too many weeds. (We recommend the use of "Farmogerm" for this inoculation.)

Quantity of seed required for one acre, 20 to 25 lbs.

Lb. 30c., 100 lbs. \$20.50 to \$27.00.

ALSYKE (*Trifolium hybridum*). Especially valuable for hay when grown alone or with other grasses, and with Red or Mammoth Clover. To seed an acre use fifteen pounds.

Lb. 25c., 100 lbs. \$20.50 to \$23.00.

Lb. 60c., 100 lbs. \$50.00 to \$60.00.

SWEET CLOVER (*Melilotus albus*). Quantity usually sown to the acre, 30 lbs. To eradicate Sweet Clover, mow it when in full bloom, that it may not reseed itself.

Compressed Air Sprayers

LOWELL SPRAYER. The best compressed air sprayer for florists' use in greenhouses. All of the tobacco extracts can be used to best advantage with this sprayer. It is both automatic and positive in its action. One charge is sufficient to expel its entire contents. Each sprayer is thoroughly tested with both air and water pressure before leaving our factory. Having convex heads, entire contents can be drained from machine, leaving it perfectly dry when not in use. Heads, after being seamed and riveted are dipped into molten solder, making it absolutely air tight and the strongest Air Pressure Sprayer made, standing five times the air pressure necessary to operate. Tree attachment, consisting of three feet of 3/8-inch 3-ply, C. I. Rubber Tubing with spray nozzle one foot long, for small tree and shrub spraying; funnel with brass wire strainer cloth for filling, and shoulder strap for carrying furnished with each machine, also attachment to spray the underside of leaves. Capacity of tank, three gallons. Galvanized steel, \$5.00 each, brass \$7.25 each. Complete.
